

UPDATE COVID-19 Statement

We want to provide a quick update on Apex Industrial Automation/lesco LLC and our current status.

We are NOT subject to the mandated closing of all non-life-sustaining businesses in Illinois. APEX and our business partners, play a key role in keeping essential products and industries moving during this difficult time, such as food, paper, packaging, cold storage and municipalities among many others.

There are a few of our local suppliers/manufacturers that could be impacted and we are working with them to try to maintain product flow. There does not appear to be any immediate supply risks. As we get more specifics, we will communicate them.

We have no reported infections within the Apex team, however to minimize exposure our office/support staff members will begin working remotely Monday. We have the technology and solutions in place to ensure zero disruption.

Please continue to contact us through the many following communication channels.

- **Email:** sales@apexindustrialautomation.com
- **Phone:** 630-969-7890 or 866.924.2808
- **Text:** 774-APEX-NOW
- **Fax:** 630-969-3242

For our repair team we have implemented social distancing requirements, increased our cleaning processes and provided flexible schedules for employees that have been impacted with school closures, healthcare challenges or people who are in some way at risk to exposure of the virus.

Our intention is to stay open until we are mandated to do otherwise. We will continue to communicate our status as we move forward.

Thank you and we hope everyone stays safe and healthy!
