

"The APEX Difference"

Ten years ago, I began with a vision to build a truly world class service organization. Today's customers expect and DESERVE more from their suppliers. APEX continues to set standards by which all other distributors are measured. APEX was the first to develop a company iPhone and Android App. We continue to pioneer our online Asset Manager software, offering customers real time inventory, pricing and electronic ordering. We've coupled these services with our Repair and Control Panel Shops. We continue to hire and invest heavily in our human assets as we thrive to be consultants for our customers. Our team is passionate about the success of our customers. We are available to assist 24 hours/7 days a week. Give us an opportunity to demonstrate our capabilities, you won't be disappointed.

Ryan Watts
Owner/President

Services

Fully Integrated Repair, Machine & Control Panel Shops
